

## Applying Logos at Home

1. Please follow directions carefully. No short cuts.
2. Line up t-shirt and the logo first so you can see exactly where you will place the logo on the shirt. Do this before any heat is applied.
3. **Put the logo aside** and use a hot iron to **apply lots of heat to the shirt before placing the logo down**. Be sure to heat for 30-40 seconds to get the material nice and hot!
4. Place the logo on the shirt.
5. Hold the iron against the logo for another 30-40 seconds, applying pressure to really make sure the logo sticks.
6. Let the shirt cool, and then care for it as you would normally.

## If you make a mistake and mess up the shirt...

Do not go on to another, and another and another!!! J&B Hockey and Sports at 162 President Avenue can iron them on for you. They will apply a logo to a shirt for \$2, or you can purchase from them a t-shirt with a logo on it for \$6. They and other vendors will also give you a price on embroidery if you are interested.
